SUMMARY

If there is one thing I can do, it's learn. I have worked a decade in social work and have learned that people are always changing and if I want to create impact, I must learn and have integrity. From a desire to improve efficiency, I learned Google Apps Script, which flourished into a curiosity of web development and now having a year of learning I can create using HTML, CSS, Javascript, React, Drupal, Wordpress. I can test with Cypress, use Gatsby, Vite. And still I continue to learn. I won't say I know it all, but I sure do know how to figure it out when I need to and I'm quick to lean on all the resources available to me.

SKILLS

- **Front-End**: HTML, CSS, JavaScript, React, Gatsby, Vite
- **Testing**: Cypress
- **Automation**: Google Apps Script
- **CMS**: Contentful, Wordpress, Drupal
- **Analytics**: Google Analytics
- **Version Control**: Git, Github
- **Local Development**: Lando, Docker
- **Hosting Platform** : Pantheon

PROJECTS

Pokemon Habitats Populator (Paid Contract)

- Integrated MySQL for efficient data management and filtering of approximately 1000 Pokémon entries.
- Collaborated closely with the client to translate requirements into mockups and deliver a tailored, client-approved solution.
- Demonstrated adaptability, problem-solving, and effective communication in a paid contract role.

Drupal Practice Site (Personal Project)

- Proficiently built and customized a Drupal website, utilizing Lando for Docker to manage local development, and implementing content types, modules, URL aliases, blocks, and views.
- Enhanced user experience by simplifying content editing, making the site user-friendly for non-technical users.
- Employed Composer and Drush for efficient module management, ensuring seamless integration of essential features and functionalities.

Recipes Website (Personal Project)

- Created a dynamic recipes website using Gatsby as the static site generator and Contentful as the CMS.
- Implemented GraphQL to query data and render a user-friendly interface.

Random Quote Generator and Money Exchange Calculator Apps (Personal Projects)

- Developed apps utilizing RESTful APIs to provide real-time data and user interactions.

EXPERIENCE

Transformative Education Counselor My Friend's Place

Los Angeles, CA | 2019-Present

- Utilized Google Apps Script to automate data tracking, email communication, and calendar functionalities, resulting in improved accuracy and streamlined processes.

- Developed crisis management skills to efficiently organize and prioritize tasks, meeting tight deadlines during the fiscal year-end data organization.

- Collaborated with diverse teams and clients to identify and create actionable goals, establish clear expectations, and develop effective strategies to achieve desired outcomes.

Program Director One-Eighty Youth Programs

Lodi, CA | 2017-2019

- Transformed the organization's website using Wix, implementing SEO strategies and Google Analytics, and improving user engagement, leading to a 100% increase in website visits and social media followers.

- Collaborated with managers to maintain brand consistency on the website and social media platforms.

- Created a comfortable, safe, and fun atmosphere uniquely suitable for reaching varying demographics within the surrounding community, resulting in a 25% increase in program enrollment and retention.

Youth Director Cornerstone Church of Lodi

Lodi, CA | 2014-2017

- Fostered strong relationships with diverse groups of students and parents, demonstrating effective communication and empathy.

- Led a team of volunteers, cultivating a supportive environment that encouraged engagement and active participation in youth activities.

EDUCATION

freeCodeCamp

Responsive Web Development & JavaScript Algorithms

William Jessup University, Rocklin, CA

Graduated 2018 with a BA in Youth Ministry
